  Pr P. Netter – Director of the pôle BMS, University of Lorraine
  Pr H. Coudane – Dean of faculty of medicine

14h00 - 18h00 Session 1. Concepts and models
Moderators: Francis Guillemin – Cyril Tarquinio

Objective: to help clarifying concepts and discuss conceptual models to use for assessing chronic
diseases and their impact on quality of life, dependency or medical care

- Chronic disease in medicine: past, present and possible future of a problematic concept:
  J. Coste (France)
- ICF and other conceptual models: Rethinking the role of context and implications for assessing
  health: E. Badley (Canada)
  ○ Discussant: J. Bickenbach (Switzerland)
- Chronic conditions, Disability and Perceived health: Empirical support of a conceptual model:
  J. Alonso, C. G. Forero, N. D Adroher, G. Vilagut, on behalf of the World Mental Health (WMH)
  Consortium (Spain)

16h15 - 16h30 Coffee break

- Models of perceived quality of life: D. Patrick (USA)
- Psychosocial approach for a conceptualization of adaptation process in chronic diseases:
  M. Morin (France)
  ○ Discussant: E. Spitz (France)
8h30 - 12h30  Session 2. Measurement

**Moderator:** Alain Leplège

**Objectives:**
- to identify the new perspectives offered by recent development in IRT methods for validation and calibration of measurement
- to present current initiatives to improve construction of item and instruments in adequation with concepts and domains of investigation
- to introduce e-health technologies in measurement area

- **Introduction:** A. Leplège *(France)*
- **Advances in social measurement:** A Rasch measurement theory: D. Andrich *(Australia)*
  - Discussant: S. Kreiner *(Denmark)*

9h45 - 10h00  Coffee break

- **Item generation and construction of questionnaires:** N. Tamm, J. Devine, M. Rose *(Germany)*
  - Discussant: A. Tennant *(United Kingdom)*
- **Application in medicine:** J. Hobart *(United Kingdom)*
- **Development and preliminary testing of the Animated Activity Questionnaire (AAQ) for assessing activity limitations in patients with hip and knee osteoarthritis:** W.F. Peter, F. Guillemin, C.B. Terwee *(France)*

12h30 - 14h00  Lunch

14h00 - 18h00  Session 3. Interpretation of perceived health data

**Moderators:** Serge Briançon – Joëlle Kivits

**Objective:** to discuss the clinical and methodological aspects of the interpretation of perceived health data.

- **Social heterogeneity in reported health:** Is self-assessed health more biased than other reported health indicators? F. Jusot, S. Tubeuf, M. Devaux, C. Sermet *(France)*
  - Discussant: T. Lang *(France)*
- **Impact of response-shift on the interpretation of a longitudinal structural equations model: an application on the SATISQOL study:** J. B. Hardouin, M. Blanchin, V. Sébille *(France)*

15h30 - 15h45  Coffee break

- **Interpretation of perceived health data in a specific disease:** A.C. Rat, C. Baumann, J. Pouchot *(France)*
  - Discussant: D. Beaton *(Canada)*
- **Interpretation of data in psychology:** A false problem: M. del Rio Carral, M. Santiago-Delefosse *(Switzerland)*
  - Discussant: C. Scodellaro *(France)*
Friday 6 June 2014

Moderators: Joël Coste – Elisabeth Spitz

Objective: to discuss the use of perceived health research data for individual (clinical) or public decision making

8h30 - 12h00  Session 4. Knowledge and decision

- Perceived individual freedom and collectively provided care: E. Picavet (France)
  - Discussant: C. Guibet-Lafaye (France)

- Patient-reported outcomes: Clinical applications in the field of chronic pain self-management: J. Elander (United Kingdom)
  - Discussant: M. Debouverie (France)

10h15 - 10h30  Coffee break

- Public health practical aspects – round table (moderator: S. Briançon (France))
  - J. Bloch (France), C. Le Gales (France)

12h00  Closing of the conference

12h15  Farewell lunch basket
In partnership with:
